TOTAL E&P SOLUTIONS PROVIDER...

About EnQuest

EnQuest is a complete solution provider with an aim to create and deliver value for E&P operators through tailor made solutions to every project, ensuring a cost effective and timely project execution.

We take pride in our team of qualified and skilful professionals having significant field experience, dedicated to design fit for purpose programs with a singular aim of delivering value.

We devote a considerable amount of time gathering all relevant information and understanding the client's business objectives prior to commencement of any project so as to serve them scrupulously with congruous productivity.

To address the issue of increasing complexity of projects, we continue to include best in class technologies, augment our team with professionals having relevant experience and train our existing team to meet and deliver projects in line with our vision and commitment to ensure client satisfaction.

We deliver high performance energy services and solutions, combining unparalleled technical know-how, skills and technology with innovative commercial arrangements. We have the ability to integrate resources to deliver small, medium and large scale projects.

Why partner with EnQuest?

Being cost intensive, it is important that every stage in the life of E&P cycle is managed by an experienced and cohesive team with in-depth knowledge of both commercial and technical aspects of the business.

Our team of experts and industry veterans have been working in tandem for over 25 years and endeavour to use the established 'best' practices; as well as the latest technological developments to ensure maximum productivity.

- We provide a multi-layered management system, thereby giving requisite focus to each project activity.
- We have an in-house core team of highly qualified professionals of various nationalities with more than 400 years of cumulative operational experience.
- We manage the entire project chain – from seismic acquisition to processing & interpretation, field development (both Onshore & Offshore), pre-drilling activities, well design, drilling operations, production management, subsurface studies to provide advisory services.
- We provide complete Marine Logistics services & shore based management support for all kinds of Offshore projects.
- Proven success attributed to expert knowledge, in-depth research, custom designs and implementation plans.
- We Have in-house analytical software for effective planning and operations management implementation.
- Capability to undertake peer reviews, conduct audits, provide training, etc.
- We deliver high quality relevant solutions while ensuring cost effectiveness within agreed time schedules.

Drilled over 413,000 feet

Zero lost time on all projects

Delivered 20 projects related to knowledge sharing & advisory

Delivered 44 drilling related projects-including deepwater. (water depths ~1500m)

Managed projects in excess of US \$620 million

Delivered various projects related to geology & geophysics

Managed & Operated 5 Marine Logistics Projects for Drilling & Offshore construction

OUR SERVICES

ADVISORY

We provide integrated advisory services to oil & gas industry:

- E&P Strategy
- Portfolio valuation and optimization
- Regulatory approval
- Resource & Reserves evaluation
- Risk management
- Transaction support and due diligence
- Environment impact assessment
- Environmental and regulatory process management
- Health, safety and risk management.

SEISMIC OPERATION

We provide various seismic and geophysical services including:

- 2D/3D seismic survey design & planning
- Data acquisition management & field QC
- Land/Marine seismic (2D/3D/4D) data processing
- Survey evaluation
- Illumination studies
- Tape transcription
- Seismic reconstruction
- Full Tensor Gradiometry (FTG) studies

SUB SURFACE STUDIES/CONSULTANCY

We have the capability to provide variety of subsurface solutions. Some of our key capabilities include:

- Petrophysics and image analysis
- Reservoir seismic characterization
- Integrated well planning
- Exploration and appraisal
- License rounds
- Operations geology
- Integrated field studies including EOR/IOR
- Kinematic structural modelling

MARINE LOGISTICS

We provide complete Marine Logistics services & shore based management support for Offshore projects.

- We have exclusive partnership with large fleet Owners for different types of Rigs, AHTS, Accommodation barges etc.
- Dedicated personnel for constant monitoring and support of the vessels.
- Warehousing Support.

DRILLING PROJECT MANAGEMENT

We provide management of drilling / testing completions operations catering to the entire drilling project chain

Project Planning & Budgeting

- Review of Geological/Offset Well Data
- Conceptual Well Design
- Procurement Strategy
- Drilling Plan & Budget (AFE)

Well Engineering

- Final well design
- Peer review
- Prepare Drilling Program

Procurement

- Preparation of Scope of Work (SOWS) for Tangibles, Drilling rig & Services
- Preparation of Tender Document
- Bid Evaluation
- Award Contracts

Site Preparation/ mobilization

- Ensure all Statutory/ Regulatory Compliances in Place
- Site preparation
- Third Party inspection for Rig Tangibles & Services
- Mobilise rig and services

based on planned commencement date.

- Set up logistics/ supply base

Drilling Operations Management

- Monitor and Manage Real Time Drilling Operation & Reporting
- Prepare Daily Operation Forecast & Cost Analysis
- Ensure HSE Compliance
- Logistics Management
- Prepare Well/ Project Reports

We are passionate about our aim to create and deliver value for E&P operators through unique solutions to every project, ensuring a cost effective & on-time project execution.

FIELD DEVELOPMENT & OPERATION SERVICES

Preparation of Field Development Plan, including:

- Preparation of Static Geologic Field Model
- Preparation of Dynamic Reservoir Model
- Determination of HIIIP & EUR
- Optimization of Well Numbers & Placement within Reservoir
- Well Construction Design & Engineering
- Identification of Facilities Design Requirements
- Conceptual Engineering & Coordination of Detailed Front End Engineering
- Completion of necessary Offshore Surveys / Data collection
- Coordination of EIA Study for Environmental Clearance
- Tendering and Procurement of Services, Facilities, Equipment and Tangibles
- Economic Analysis and Preparation of Investment Decision Package
- Logistics Coordination

- Drilling Management
- Project / Construction & Installation Management
- Commissioning and Start up Supervision
- Production Operations Management
- Field Decommissioning and Abandonment Services

KNOWLEDGE SHARING

It's important that at every stage of the E&P cycle, knowledge is captured and shared. We conduct the following services:

- Process audits
- Well audits
- Equipment audits
- Technical/peer reviews
- Training schools
- Data Management

CATERING & HOUSEKEEPING

We provide following services for both Offshore and Onshore installations:

- Catering
- Housekeeping Services
- Facility Management

OUR SERVICES

- Advisory
- Seismic Operation
- Sub Surface Studies/Consultancy
- Marine Logistics
- Drilling Project Management
- Field Development & Operations
- Knowledge Sharing
- Catering & Housekeeping

OUR EDGE

- Outstanding Technical Knowledge
- Project Execution Expertise
- Track Record of Success
- Unique Regional Experience
